**PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS**

The INDIANAPOLIS AIR POLLUTION CONTROL BOARD (APCB) met to conduct its regularly scheduled meeting on July 10, 2003 at 9:30 a.m. in Room 107 of the City-County Building.

THOSE PRESENT WERE:

Bruce Wallace, Acting Chairman
Roland Salman, Member
Bill Brown, Member
Dennis Achgill, Member
Chuck Fraley, Member
John Chavez, Technical Secretary
Matt Senseny, Board Counsel

ABSENT:

Robert Daly, Chairman
Bernie Paul, Vice Chairman
Tom Barnard, Member
Tom Rarick, Member

GUESTS PRESENT:

Richard Van Frank, Improving Kids Environment
Denise Curtis, National Starch and Chemical Company
Wade Kohlmann, Citizens Gas & Coke Utility

RE: CALL TO ORDER - REGULAR MEETING

Mr. Bruce Wallace called the meeting to order.

RE: ADOPTION OF AGENDA

Mr. Wallace solicited modifications to the Agenda. There were three (3) additions presented by Mr. John Chavez and Mr. Wallace.

1. Under item (7) New Business (a), Discussion on Air Quality Criteria for Particulate Matter.
2. Under item (7) New Business (b), Preliminary Adoption of Regulation 1-2-3.
3. Under item (7) New Business (c), Knozone Alert.

Mr. Dennis Achgill made a motion the Agenda be adopted as amended. Mr. Roland Salman seconded the motion and said motion carried.

RE: ANNOUNCEMENTS

Mr. John Chavez announced Mr. Wallace has been re-appointed to the APCB. He received notice on June 30, 2003 and that his term will expire on June 3, 2007. Mr. Chavez also stated Mr. Dennis Achgill's term expired June 30, 2003. However, there are provisions in the state law to allow his continued participation in the Board until re-appointment occurs. The Mayor's Office is currently working on this process.

RE: APPROVAL OF MINUTES

Mr. Wallace stated that since a quorum of the Board Members present at the May 8, 2003 or June 12, 2003 meetings were not present at this meeting, the Board would not be able to approve the Minutes from the May 8, 2003 or the June 12, 2003 meetings. Mr. Wallace solicited modifications to the Minutes for the May 8, 2003 meeting. There were none. A copy of the May 8, 2003 and June 12, 2003 minutes will be included in the next APCB packet.

RE: STAFF REPORTS - May 2003, Monthly Activities Report

(Air Monitoring Activities Report)

Mr. Aaron Childs updated the Board on the Air Monitoring Activities for May 2003. The Air Quality Index (AQI) for May 2003 was in the good and moderate categories. During May 2003

PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

the average temperatures were unusually low. Since temperatures affect ozone, the ozone readings in May 2003 were lower than usual. The Board asked if staff would provide regional maps of ozone. Mr. Childs stated, as discussed at the previous Board meeting, that on days when there are high ozone readings, he will provide the Board with those maps.

The PM 2.5 readings were typical in May 2003. The annual averages for PM 2.5 was included in the packet. These averages are expected to increase during the summer months.

(Permit Activities Report)

Ms. Monica Dick updated the Board on the Permit Activities Report for May 2003. She stated the table in the Permits Activities Report has been slightly modified. The process for "Permits Waiting to Construct" has been removed. The way the Air Permit Manager database is currently set up to query reports is causing the information to be reported inaccurately. She is holding off on having anymore work done to the Air Permit Manager database so the money can be used to get permits issued. She does intend to have the information put back into report in the fall. She distributed a report to the Board listing all the permits currently in-house as of July 8, 2003. There was also a report included in the Board Packet that indicates the process of each application in-house.

The Board found the information provided as very helpful. Although there is a lot of information on these additional reports it is good to have it. The Board asked for clarification on the difference between the "Final" column and the "Decision Made" column. Ms. Dick stated a final permit is what is submitted to IDEM for review. Once the permit is approved to issue by IDEM it will then go into the "Decision Made" column.

(Stationary Source Compliance Activities)

Mr. Matt Mosier updated the Board on the Compliance Activities Report for May 2003. During the month of May, the Compliance Section inspected two (2) Title V sources, seven (7) FESOP sources, and one (1) SSOA source. There were two (2) sources flagged National Starch and Mar-Zane, Inc. A Warning letter was issued to Mar-Zane for record keeping problems and National Starch is still under review. The percentage of sources flagged at inspections is 23% year to date. The Board asked why there is two inspection dates for National Starch. Mr. Mosier stated that with larger sources it sometimes takes two days to complete the inspection.

Mr. Chuck Fraley welcomed Matt Mosier back.

(Notice of Violation/Agreed Judgement Activities Report)

Ms. Cheryl Carlson updated the Board on the Enforcement Activities Report for May 2003. During the month of May, there were three (3) Notice of Violations (NOV) without referral, two (2) NOV's with referral, and three (3) Warning Letter issued. There was also three (3) source conferences held.

There were two (2) different NOV's issued by the State to Citizens Gas and Coke Utility. These are a result of continuing problems with E & H battery. These will most likely be resolved as one issue.

New Information:

Cryovac, Inc. - A Compliance Agreement was signed by the company on June 3, 2003.

E & B Paving, Inc. - A NOV was issued for "Permits - Failure to submit FESOP renewal application in a timely manner." The FESOP has since been issued.

Indianapolis Athletic Club - A NOV was issued for "Emission Standards for Asbestos; Demolition and Renovation Operations." A source conference was held and staff is in the process of drafting a proposed Compliance Agreement for their consideration.

PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

Joe's Auto Sales - A NOV was issued for "Motor Vehicle Tampering and Fuel Switching." A source conference is scheduled for the week of June 16th.

Marathon Ashland Petroleum, LLC - A Compliance Agreement was signed by the company on April 17, 2003 and a penalty of \$2,400.00 was assessed.

Martin Enterprises - A Compliance Agreement was signed by the company on May 8, 2003 and a penalty of \$2,000.00 was assessed.

Mead Westvaco Corporation - A Compliance Agreement was signed by the company on June 3, 2003.

P.M. Mechanical, LLC - A NOV was issued for "Emission Standards for Asbestos; Demolition and Renovation Operations." Staff has not received a response from the company. If staff has not heard from them in a month a hearing will be scheduled.

Rieth Riley Construction Company, Inc. - A Compliance Agreement was signed by the company on June 3, 2003 and a penalty of \$2,400.00 was assessed.

Statewide Medical Services and Supply, Inc. aka. MED/dispose, Inc. - A Proposed Compliance Agreement has been sent to company. The NOV had to be reissued to the company due to the legal entity of the company.

Weihe Construction, Inc. - A NOV was issued for "Fugitive Dust Emissions". A source conference was held and staff is in the process of drafting a Proposed Compliance Agreement.

The Board inquired about the increase of asbestos violations and what types of violations are being seen. Ms. Carlson stated the majority of the violations are for renovation where asbestos material has been disturbed. If they had an inspection conducted prior to the work, the material would not have been disturbed. The Board inquired if it is necessary to educate the regulatory community at large about asbestos. Ms. Carlson stated staff is currently working on developing a program for special residential asbestos, which will include proper removal of residential asbestos. Most of the sources listed on the report were complaint generated.

(School 21)

Mr. Chavez provided an update to the Board on the School 21 Project. He stated there were two (2) meetings regarding the School 21 project. A meeting was held on June 11, 2003 with IDEM, EPA, and the stakeholder group. The meeting was to discuss the development of a protocol for characterizing the potential risks associated with any of the air emissions that are being monitored at School 21. The group put together a lot of questions that they would like to have answered by the risk characterization. IDEM is in the process of putting together a draft protocol for the risk characterization.

The meeting held on June 18, 2003 to go over the discussion that took place at the June 11, 2003 meeting. They also discussed the first fifteen days of data that has been generated. The gas chromatograph unit that was installed for this project began collecting data on May 15, 2003. There have been some spikes in the data received thus far. It is providing better information relative to the daily variability of the air emissions that surround School 21. The group continues to move forward. The next meeting is scheduled for August 28, 2003.

Mr. Dick Van Frank from Improving Kid's Environment is very active in the group and reported additional information to the Board on the School 21 project. Mr. Van Frank stated he found where the State has posted data from School 21 on the Internet. There is a lot of data. He plotted some of the data, benzene and toluene, and stated these are episodic events. The advantage of this data is that there is a meteorological monitor on site. The wind direction is known for every hour these samples are taken. Most of the

PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

spikes in the data seem to occur from midnight to early morning hours. There are rarely any spikes during the day. There is also spikes of toluene when there is not any spikes of benzene. He feels the information is very useful and will answer a lot of the questions. The Board asked if Mr. Van Frank would like to share with the Board any early conclusions. Mr. Van Frank stated more data is needed to draw an early conclusion.

Mr. Chavez stated at the last meeting the Board wanted to know what the method detection limits are for the compounds. He distributed a table listing these compounds. They can be found on the State's website at <http://www.in.gov/idem/air/toxwatch/data/minimum.html>. The School 21 data can also be found on the State's website at <http://www.in.gov/idem/air/amb/data/toxic/toxic.html>.

There has been discussion on when is there enough data to begin analyzing and drawing conclusions. It is probably worthwhile to continually look at it so there is not a monumental task at the end of a six-month or a one-year period. It does need to be determined on what time frame the data will be looked at and run the analyses on that time period. The Board suggested a thirty-day graphical block and cube that into quarterly, semi-annual, and annual so that the climatology issues are addressed at the same time.

The Board asked Mr. Wade Kolhmann of Citizens Gas and Coke Utility if they have had a chance to look at the data online and compare it to any of the production schedules at the coke plant. Mr. Kohlmann stated not yet. He also stated they do not shift their production very much. The Board asked if the plant operated 24 hours a day. Mr. Kohlmann stated yes, 24 hours a day 365 days a year.

(Central Indiana 8-Hour Ozone Steering Committee)

Mr. Chavez stated a Central Indiana 8-Hour Ozone Steering Committee meeting has not been held since the last APCB meeting. He did inform the Board that IDEM has sent out their recommendations for non-attainment/attainment designations to all interested stakeholders. They have asked for comments on the proposed recommendations by July 15, 2003. The City of Indianapolis has prepared a comment letter. Once the letter is finalized it will be given to the Board.

The Steering Committee that IDEM has put together is not going to meet again until September 2003. IDEM is using this time to do some of the ground work that needs to be done such as inventory development, episodic modeling and other sorts of modeling needs to occur.

The Board asked if the changes to the Metropolitan Statistical Area (MSA) affected the Steering Committee. Mr. Chavez stated it was discussed at the May 30th meeting and at that time it was not official. There is a question if Brown County and Putnam County are going to be pulled into the Steering Committee because of the MSA issues. Mr. Childs stated that on a teleconference course he attended it was mentioned that the old MSA is what was going to be used when determining attainment/non-attainment designations.

The Board inquired if Putnam and Brown Counties are brought in, is it a result of data indicating that they should be. Mr. Chavez stated there are no monitors in these counties, and it would be a result of the MSA determination. This is because of the EPA guidance for 8-Hour Ozone Implementation. The guidance states that if you are a contributing county or part of an MSA to a county that is in non-attainment than that county is also classified as non-attainment. There are several factors looked at while making MSA determinations, such as, the size of the town, population, commuters back and forth, population growth, and stationary sources.

Mr. Chavez stated all of the counties in Indiana that have monitors are listed in the State's recommendation as being designated as non-attainment. There are some monitors in those counties that show attainment, however there is another monitor in the same county that is out of attainment.

PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

RE: UNFINISHED BUSINESS

There was none.

RE: NEW BUSINESS

(Air Quality Criteria for Particulate Matter)

Mr. Martin distributed an Executive Summary for Air Quality Criteria for Particulate Matter and a list of abbreviations and acronyms that are used throughout the document. The actual document is over 1800 pages long. EPA recently released this document for review. The EPA is required by the Clean Air Act to review the standards for criteria pollutants every five (5) years. They have been reviewing the particulate matter standard for several years. EPA is very thorough when they review the standard for any of the criteria pollutants. There are a lot of changes, suggestions, and new information based on health studies that have been released recently. If the Board has questions regarding this document, they can contact Mr. Martin at 317-327-2234.

(Preliminary Adoption of Regulation 1-2-3)

Staff recommends that the Indianapolis Air Pollution Control Board Regulation 1-2-3 be amended to read as follows:

Section 2-3 Version of the State Rule adopted. Adoptions by Reference to Title 326, Indiana Administrative Code, comprise all Amendments, Additions, and Repeals on file with the Indiana Secretary of State through May 10, 2003 and published in the June 1, 2003, Indiana Register unless otherwise indicated in a particular regulation. The only regulatory change other than minor text adjustments this will actually effect is Regulation 20 Hazardous Air Pollutants HAPs. The change requires boat manufactures to use the maximum achievable control technology (MACT) for HAPs. This rule change will not affect any business in Marion County.

Mr. Wallace solicited the Board to preliminarily adopt the updated incorporation by reference of the Regulation 1-2-3. This incorporation by reference adopts Title 326 Indiana Administrative Code and all amendments, additions and appeals on file with the Indiana secretary of State to 061/01/2003 unless otherwise indicated in a particular regulation. Mr. Bill Brown made a motion to adopt the proposed changes to Regulation 1-2-3 to update the incorporation by reference of Indiana Department of Environmental Management rules through June 1, 2003. Mr. Achgill seconded the motion and said motion carried.

A public hearing will be scheduled for August 14, 2003 at 9:30 a.m. in room 107 City-County building. This notice will appear in the Indianapolis Star at least ten (10) days prior to the hearing.

(Knozone Alert)

Mr. Wallace stated on the first Knozone Action Day the information was broadcast on the interstate signs. He noticed the Knozone message was also flashing on days when a Knozone Action Day was not called. He is concerned that saturated information will cause the message to be less effective. Mr. Chavez stated staff is aware of this and the DPW Public Information Office has been in contact with the Indiana Department of Transportation to ensure that the alert is only broadcast when a Knozone Action Day is called.

(International Annual Air and Waste Management Association Conference)

PRELIMINARY MINUTES - July 10, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

Mr. Kolhmann of Citizens Gas & Coke Utility announced that in 2004 the Indiana Chapter of the Air and Waste Management Association is hosting the International Annual Air and Waste Management Association Conference. It will be held in Indianapolis. This is a huge air pollution and waste conference. There will be approximately 4,000 to 6,000 pollution experts including academics, engineers, and regulators attending the 2004 Conference. They may ask the APCB Board in early 2004 to do a proclamation. Ms. Carlson distributed pins with the 2004 International Annual Air and Waste Management Association Conference logo. The Board asked if it was possible to change the APCB meeting for the month to happen the week of the conference and to possible have an open house of some sort. Mr. Chavez stated it should be possible and he would look into it.

RE: ADJOURNMENT

Mr. Fraley made a motion the meeting be adjourned. Mr. Bill Brown seconded the motion and said motion carried. The next Indianapolis Air Pollution Control Board meeting will be on August 14, 2003 at 9:30 A.M. in room 107 City-County Building.

AIR POLLUTION CONTROL BOARD

Bruce Wallace, Acting Chairman

ATTEST:

John Chavez, Technical Secretary
Indianapolis Air Pollution Control Board

Date: _____

PRELIMINARY MINUTES - June 12, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

The INDIANAPOLIS AIR POLLUTION CONTROL BOARD (APCB) met to conduct its regularly scheduled meeting on June 12, 2003 at 9:30 a.m. in Room 107 of the City-County Building.

THOSE PRESENT WERE:

Robert Daly, Chairman
Tom Barnard, Member
Tom Rarick, Member
Chuck Fraley, Member
John Chavez, Technical Secretary
Matt Senseny, Board Counsel

ABSENT:

Roland Salman, Member
Bernie Paul, Vice Chairman
Dennis Achgill, Member
Bruce Wallace, Member
Bill Brown, Member

GUESTS PRESENT:

Richard Van Frank, Improving Kids Environment

RE: CALL TO ORDER - REGULAR MEETING

Dr. Robert Daly called the meeting to order. He stated since the Board attendance did not meet the requirements for a quorum, an information meeting would be held.

RE: ADOPTION OF AGENDA

Dr. Daly solicited modifications to the Agenda. There was one (1) addition presented by Mr. John Chavez.

1. Under item (5) Staff Reports (g), Update on the Knozone Program Kick-off.

RE: ANNOUNCEMENTS

Mr. John Chavez introduced Mr. Dana Armstrong. Mr. Armstrong is a Project Manager for the Compliance Section of the Office of Environmental Services. He would be updating the Board on the Compliance Monthly Activity Report.

RE: APPROVAL OF MINUTES

Dr. Daly solicited modifications to the Minutes for the May 8, 2003 meeting. There were none. The APCB approved them preliminarily until the next meeting. A copy of the May 8, 2003 minutes will be included in the next APCB packet.

RE: STAFF REPORTS - April 2003, Monthly Activities Report

(Air Monitoring Activities Report)

Mr. Aaron Childs updated the Board on the Air Monitoring Activities for April 2003. The Air Quality Index (AQI) for April 2003 was in the good and moderate categories. On April 14, 2003 the readings were close to the Unhealthy for Sensitive Groups, which was due to ozone. It was a warm day in the lower 80's and the air was stagnate. The PM 2.5 levels were also slightly elevated on this day.

The April 2003 report included ozone data. April is the beginning of the ozone monitoring season. The sites collecting data are the same sites that collected data in 2002. The Board commented that on the days that were close to exceeding the standard, the background data was as high or higher than the downwind data. This is an indication that ozone is high regionally. Mr. Childs stated it is often the case that high ozone readings are regional and not isolated locations.

Mr. Chavez asked if it would be helpful to the Board for staff to print out ozone maps of the 8-hour composite on the days the ozone readings are high. The Board stated these would be helpful and would like the maps.

PRELIMINARY MINUTES - June 12, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

Mr. Chavez stated the Harding Street site indicated higher readings but not as high as other sites and inquired if this could be because of construction going on in the parking lot of where the monitor is located. Mr. Childs stated sites in the center of a city are typically lower than sites outside a city. NOx emissions from vehicles actually help reduce the ozone a little because of what is called "NOx scavenging". "NOx scavenging" is when O₃ is converted back to O₂.

(Permit Activities Report)

Mr. Chavez updated the Board, in the absence of Ms. Monica Dick, on the Permit Activities Report for April 2003. During the month of April twenty-two (22) permit applications were received. Twelve (12) of which were Minor Source Operating Permits (MSOP). There were also eleven (11) decisions made in during the month of April. There have been eighty-four (84) decisions made year to date and the active workload is one hundred eight (108) permits. For sources waiting to construct, there was one (1) application received and three (3) decisions made in April 2003.

The Board inquired why there were twenty-two (22) applications received in April but only six (6) started initial processing. Mr. Chavez stated it is possible that there are unanswered questions on the application so a decision has not been made on what path the application will take. Mr. Chavez said he would find out what the administrative processes of the permits are and report back to the Board.

The Board stated that from an industrial standpoint the main concern is how long is it taking to issue a permit from the time the application is submitted to the time that it is issued. They also inquired if there is a list available of the permits that are currently in process and when those were received. Mr. Chavez stated staff is currently in the process of developing software that will allow "actual time" reports to be generated. The Board is concerned there are applications that have been in process for several years. Mr. Chavez stated it should be possible to have a report generated for the Board providing this information.

The Board inquired if it is possible to list the name of the companies who have submitted an application as a second page to the monthly report. Mr. Chavez stated yes that this could be included in the packet.

(Stationary Source Compliance Activities)

Mr. Armstrong updated the Board on the Compliance Activities Report for April 2003. During the month of April, the Compliance Section inspected three (3) Title V sources, four (4) FESOP sources, two (2) SSOA sources and one (1) State Minor source. There were two (2) sources flagged and a request for additional information has been sent to the sources. There were two (2) stack tests observed during the month. The percentage of sources flagged at inspections is 24% year to date.

(Notice of Violation/Agreed Judgement Activities Report)

Ms. Cheryl Carlson updated the Board on the Enforcement Activities Report for April 2003. During the month of April, there were four (4) Notice of Violations (NOV) without referral issued for "Fugitive Dust" violations. There were also two (2) companies issued a NOV without referral for "Failure to Submit Annual Compliance Certification". Last year these companies were issued Warning Letters. Next year if they do not submit their Annual Compliance Certification, it will result in a penalty. Three (3) Warning Letters were issued and two (2) source conferences were held.

Ms. Carlson stated OES had received an "Appeal Request" from Little-Ton Sand and Supply. Staff has met with the company and they have withdrawn their request for an appeal.

The Board asked if there was a connection between Malaspino Restoration, Inc. and the Indianapolis Athletic Club because the Indianapolis Athletic Club was not on the Enforcement Actions Report. Ms. Carlson stated they were not connected and the

PRELIMINARY MINUTES - June 12, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

Indianapolis Athletic Club will be on next month's report.

The Board inquired what type of equipment does Federal Aviation have that requires a "Annual Compliance Certification". Ms. Carlson stated that they have boilers. The "Annual Compliance Certification" verifies that nothing significant has changed and that they have been in compliance for the previous year.

The previous violations for Capital City Metals, formally known as Indianapolis Shredding, have been split. They now have violations for "Fugitive Dust" and for a "Stack Test". They now have a requirement to conduct a stack test by the middle of July 2003. They received a FESOP Renewal and are in the process of appealing the permit to IDEM. The enforcement action and the permit are going to end up being linked. So in order to resolve the fugitive dust issues, the enforcement actions have been split and will be dealt with separately. Mr. Chavez stated OES has received word from IDEM that OES will be taking the lead on the appeal of the permit. Staff is actively working with the company to resolve the issue internally. If staff is unsuccessful in resolving the issues, the appeal may come before the APCB.

New Information:

Marathon Ashland Petroleum, LLC - A Compliance Agreement was signed by the company on April 17, 2003.

Martin Enterprises - A Compliance Agreement was sent to company on May 15, 2003.

Speedway SuperAmerica LLC - A Compliance Agreement was signed on April 14, 2003 and a penalty of \$2,240.00 was assessed.

The Board inquired what the status is of Citizens Gas and Coke Utility (CG&CU), DaimlerChrysler, and Goodyear Tire and Rubber.

CG& CU - Ms. Carlson stated staff met with CG&CU at the end of May 2003 and discussed the violations. A response from the company was received the week of June 9, 2003. Staff will begin resolution of this violation. Next month there will be a new Notice of Violation issued by IDEM to CG&CU that will be included in the report.

DaimlerChrysler - Staff met with DaimlerChrysler and has proposed an offer to them for resolution. The company is in the process of determining whether they want undertake a supplemental environmental project or not for resolution. They did pass their stack test.

Goodyear Tire and Rubber - They are also known as Wingfoot. A permit decision needs to be made to find out what the appropriate level of permitting is to determine whether or not they constructed and operated without a permit. The enforcement action depends on what size permit they end up needing. They originally operated under a construction permit and did not build what was stated in their application.

The Board inquired about Wishard Hospital. Ms. Carlson stated she is working with the Permit Section to determine if they constructed without a permit.

(School 21)

Mr. Chavez provided an update to the Board on the School 21 Project. He stated there was a meeting on June 11, 2003 with IDEM, EPA, and the stakeholder group. The meeting was to discuss the risk characterization component of the grant agreement. There was a brainstorming session to identify a series of questions that the group will want answered with the risk characterization. EPA was very helpful in providing guidance on what resources could be used and what tools they could afford.

IDEM provided an update on the continuous GC monitoring. On May 15, 2003 the monitoring was initiated and they have approximately three (3) weeks of collective data. There is

PRELIMINARY MINUTES - June 12, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

another School 21 Project meeting scheduled for Wednesday, June 18, 2003 at 2:00 p.m. at the Department of Public Works Training Center located at 2700 South Belmont Avenue. The questions that came out the June 11th meeting will be presented at this meeting. A protocol will be developed for the risk characterization.

The project continues to progress and move forward. EPA seems to be very pleased with what the group is doing. Mr. Chavez will keep the Board updated on this project. Mr. Richard Van Frank stated the meeting went well. He said it would be interesting to see the continuous monitoring data. The group is very good at formulating questions and is a little slow at developing answers to those questions.

The Board asked what are the detection limits on the continuous monitors. Mr. Chavez will find out and report back to the Board. The Board asked when would the data be available for the Board to view. Mr. Chavez stated data would be available in approximately two (2) weeks via the Internet. He will provide the Board with the website.

(Ozone Flex Program)

Mr. Chavez distributed a letter from the U.S. E.P.A. which is the formal document from Tom Skinner, Regional Administrator of Region V, denying the Early Action Compact (EAC). The letter stated he is aware of the fact that Central Indiana has pulled together a Steering Committee and has begun early planning. He commends these early actions and encourages us to continue.

Ms. Jodi Perras and Mr. Chavez met with IDEM to discuss concepts of continuing the stakeholder group that has been put together. Both the State and the City are very interested in keeping the Steering Committee moving forward. There are some funding and resource questions that need to be worked out. The State is going to look into possibly adjusting the City's contract for the Title V Program to allow for some additional funds for the facilitation of the Central Indiana 8-Hour Ozone Steering Committee.

There was a meeting held on May 30, 2003 with the external stakeholder group. IDEM provided an overview on where they are as far as the ozone implementation guidance and the designation process. IDEM did send out to all interested parties their preliminary attainment designation recommendations. As suspected the Central Indiana nine counties are all designated as non-attainment. IDEM also discussed their plan for developing the State Implementation Plan (SIP) and getting to attainment. They explained the process and the timeline.

A good portion of the meeting was spent discussing what the make up should be of the new Steering Committee. There is now a need and a desire to bring in more industry representation. There was discussion on what the mission and goals could be. It was decided that it should probably stay with a similar structure as the EAC Steering Committee in which there will be a Steering Committee with Public Outreach and Technical Sub-committees. The next meeting will be held in September 2003. During this "time-off", IDEM will begin putting together their inventory and episodic modeling. In September, dialogue will begin on the appropriateness and completeness of the inventory.

(Knozone Program)

The Knozone kick-off festival was held on May 31, 2003 at Broad Ripple Park. Dr. Kno and a variety of sponsors including BP Amoco, American Lung Association of Indiana, IndyGo, BitWise Solutions, Great Indianapolis Chamber of Commerce, Citizens Gas, Union Federal Bank, the Asthma Alliance of Indianapolis, Papa Johns Pizza, and Ritter's Frozen Custard were at the event. The event was bigger and there was a greater sponsor presence than in 2002. The overall citizen turn out was about the same as 2002. Mayor Bart Peterson came to kick-off the event. Ms. Barbara Lawrence, Director of Public Works, was the MC. Mr. Chavez and a representative from the American Lung Association of Indiana spoke.

The new Knozone brochures were distributed to the Board. They are titled "Be Kind to Your Lungs" and "Help Fight Fine Particles". The health message is brought out more in these

PRELIMINARY MINUTES - June 12, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

brochures than in past brochures. A small ozone detector card was also distributed to the Board. These are being handed out at various public outreach events. These cards allow five (5) atmospheric ozone readings. The Board asked if the sponsors would be handing these out. Mr. Chavez stated some sponsors have them. He will check to see who has them. The City has worked with a variety of sponsors to provide some incentives. Union Federal Bank has committed to giving customers a gift that come inside instead of using the drive-thru window on Ozone Action Days. The City is working with others to see if there is a similar incentive that can be developed.

Mr. Chavez stated Ms. Lawrence implemented a voluntary Knozone Action Day policy for City employees to follow during Knozone Action Days. The policy includes a lot of the same steps that are asked of the public such non-critical mowing activities, refueling at the end of the day versus the beginning of day, limit excessive idling, etc. There was a lot of positive feed back from the various City agencies.

Mr. Van Frank inquired about the health alerts on Knozone Action Days. Mr. Chavez stated the Knozone alert system has been greatly expanded. There is now a health advisory policy in place. On days when ozone gets to 125 ppb, a health advisory will be sent out.

RE: UNFINISHED BUSINESS

There was none.

RE: NEW BUSINESS

There was none.

RE: ADJOURNMENT

Dr. Daly adjourned the meeting. The next Indianapolis Air Pollution Control Board meeting will be on July 10, 2003 at 9:30 A.M. in room 107 City-County Building.

AIR POLLUTION CONTROL BOARD

Dr. Robert Daly, Chairman

ATTEST:

John Chavez, Technical Secretary
Indianapolis Air Pollution Control Board

Date: _____

PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

The INDIANAPOLIS AIR POLLUTION CONTROL BOARD (APCB) met to conduct its regularly scheduled meeting on May 8, 2003 at 9:30 a.m. at the Department of Public Works Training Center.

THOSE PRESENT WERE:

Robert Daly, Chairman
Bill Brown, Member
Tom Rarick, Member
Dennis Achgill, Member
Chuck Fraley, Member
John Chavez, Technical Secretary
Matt Senseny, Board Counsel

ABSENT:

Roland Salman, Member
Bernie Paul, Vice Chairman
Tom Barnard, Member
Bruce Wallace, Member

GUESTS PRESENT:

Richard Van Frank, Improving Kids Environment
Denise Curtis, National Starch and Chemical Company

RE: CALL TO ORDER - REGULAR MEETING

Dr. Robert Daly called the meeting to order.

RE: ADOPTION OF AGENDA

Dr. Daly solicited modifications to the Agenda. There were none. Mr. Tom Rarick made a motion the Agenda be adopted as amended. Mr. Bill Brown seconded the motion and said motion carried.

RE: ANNOUNCEMENTS

There were none.

RE: APPROVAL OF MINUTES

Dr. Daly solicited modifications to the Minutes for the April 10, 2003 meeting. There were none. Mr. Brown made a motion that the Minutes be approved as presented. Mr. Chuck Fraley seconded the motion and said motion carried.

RE: STAFF REPORTS - March 2003, Monthly Activities Report

(Air Monitoring Activities Report)

Mr. Aaron Childs updated the Board on the Air Monitoring Activities for March 2003. The Air Quality Index (AQI) for March 2003 was in the good and moderate categories with the exception of March 1, 2003. He stated on March 1st the AQI reading was at 128, which is in the unhealthy for sensitive groups category. He explained this happened because the meteorology was as such that there was a build up of pollutants and caused the PM 2.5 reading to be higher on that day.

The Board inquired if the PM 2.5 AQI scale is set differently than the other pollutants. Mr. Childs stated yes. The PM 2.5 AQI scale is a little tighter than some of the other pollutants. There is continuing discussion as to whether or not the PM 2.5 standard is stringent enough. There has been discussion about lowering it further. The Board commented that the readings for PM 2.5 are reaching the unhealthy for sensitive groups level but are still meeting the standards. There was discussion that although the readings are meeting the 24-hour standard, they are exceeding the annual standard.

The Board inquired if the City will be doing any additional monitoring or putting any control measures in place during the Hyperfix since the congestion in the downtown area will be greater, thus causing higher levels of pollutants. They also inquired if the City will be eligible for any exemptions of the standards during this time. Mr. Childs stated

PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

the City did look into an exemption but was told that this is not considered an exceptional event and therefore does not qualify for an exemption. The Environmental Protection Agency (EPA) allows exemptions for significant unplanned events such as a fire next to an air-monitoring site or a volcano eruption, which affects the readings. It does not include road construction.

Mr. Chavez stated the City has established "park and rides" in some of the high traffic areas to cut back on the congestion and air quality issues. The City has also identified a series of additional routes that can be utilized. This information will be broadcast to the public. The City is making efforts to address the congestion. There has been some traffic light synchronization on some of the main one way thoroughfares through downtown.

The Board inquired if it was possible that there will be higher readings and additional days of non-compliance with the ozone standards. Mr. Chavez stated it is possible.

The Board wanted to know if since we are heading toward non-attainment does these efforts matter. Mr. Chavez stated they do matter because there are different levels of non-attainment. The City will currently be in the moderate category for non-attainment. The higher level of non-attainment the more stringent the responsibilities.

The Board asked if the City has an action plan in place to alleviate congestion in case an emergency in one of the alternative routes, such as an accident or pulling people over for traffic violations. Mr. Chavez stated he knows there is increased enforcement of the no parking areas. He will check to see if there is a plan to place for vehicles being pulled over for traffic violations. The Board inquired if public safety understands that their actions have an impact on another component of government namely air pollution. Mr. Chavez stated they are aware of the impacts. Mr. Chavez met with the group doing the transportation planning and raised these same concerns. He stated that is were the "park and ride" concept came from. The issues are being addressed however, the details are not known.

The Board commented that in addition to congestion from the traffic the equipment being used during the construction would also have an impact on the air monitoring readings. Mr. Childs stated from a public health standpoint the monitors in the area are reporting readings every hour and will page staff when the readings go over a certain level. Staff will be monitoring the readings very closely during the Hyperfix.

(Permit Activities Report)

Ms. Monica Dick updated the Board on the Permit Activities Report for March 2003. Included in the APCB packet was the revised proposed Permit Activities Report. She also included a support document explaining the revised report. The Board asked for clarification on the decisions issued. The Board asked if a decision issued is the same as a permit issued. Ms. Dick stated at this time there is not a way to distinguish a decision issued verses a permit issued. The final stage of the permit is when a permit has come off public notice and the finalizations of the permit are being done such as the technical support document.

The Board stated industry is most concerned with how long it takes to issue a permit once the application is received by OES. Ms. Dick stated staff is continuing to work on the Air Permits Manager (APM) Program to enable timeline reports to be generated.

There were also two (2) graphs included in the APCB packet. The first graph indicates applications received and permits decisions from 1996 through the first quarter in 2003. The second graph indicates the monthly average of applications received verses permit decisions made from 1996 through the 1st quarter of 2003.

Mr. Chavez stated IDEM has complimented OES on their permit progress and accomplishments in the first quarter of 2003.

**PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS**

(Stationary Source Compliance Activities)

Mr. Jeff Hege updated the Board on the Compliance Activities Report for March 2003. During the month of March, the Compliance Section inspected three (3) Title V sources, four (4) FESOP sources, and two (2) SSOA sources. There were four (4) sources flagged for missing records or missing reports. All have been referred to the Enforcement Section and the appropriate action has been taken. There were ten (10) stack tests observed during the month. The percentage of sources flagged at inspections is 24% year to date.

(Notice of Violation/Agreed Judgement Activities Report)

Ms. Cheryl Carlson updated the Board on the Enforcement Activities Report for March 2003. During the month of March, sixteen (16) Warning Letters were issued. One (1) source conference was held. There were eight (8) sources that received a Notice of Violation (NOV) for failure to submit their Annual Compliance Certification. These sources have already received a warning letter in the past.

There is a new State action against Environmental Management Institute, Inc. for accreditation of their lead based paint training program. The State has settled their action with Mead Westvaco Corporation with a penalty of \$2,400.00.

New Information:

Asbestos Inspection and Removal Company - A Compliance Agreement was signed on April 8, 2003 and a penalty of \$1,000.00 was assessed.

Certified Automotive and Towing Service - A NOV was issued for "Motor Vehicle Tampering and Fuel Switching." A source conference was held and OES is waiting for additional information from the source.

Citizens Gas and Coke Utility - A NOV was issued for "Exceedence of visible emissions limit from battery 1 from daily Method 303; exceedence of rolling 30 day average limit for Method 303; failure to keep records of routine air pollution maintenance; exceedence of H2S limit."

Citizens Gas and Coke Utility - A Compliance Agreement was signed on March 25, 2003 and a penalty of \$2,000.00 was assessed. OES was attempting to coordinate with the State a resolution since they also have an action. However, that was not successful and OES resolved its case against the source for the opacity violation.

Estridge Companies, Inc. - A NOV was issued for "Fugitive Dust Emissions".

Keystone Environmental, LLC - A Compliance Agreement was signed on April 8, 2003 and a penalty of \$6,400.00 was assessed.

Malaspino Restoration, Inc. - A NOV was issued for "Emission Standards for Asbestos; Demolition and Renovation Operations."

Prairie Material Sales, Inc. - A Compliance Agreement was signed by the company on March 13, 2003 and a penalty of \$500.00 was assessed.

Speedway SuperAmerica LLC - A Compliance Agreement was signed on April 14, 2003 and a penalty of \$2,000.00 was assessed.

The Board inquired what is the status of DaimlerChrysler. Ms. Carlson stated staff is meeting with the source in the afternoon of May 8, 2003 to discuss resolution. They conducted a stack test in January 2003. The results have been under review by both the State and OES. The process for resolution is beginning.

The Board also inquired the status of violations for Goodyear Tire and Rubber Company and the Indianapolis Shredding Company. Ms. Carlson stated she is currently working on

PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

resolution for Goodyear Tire and Rubber Company with the Permitting Section to determine the level of permit that is appropriate. The Indianapolis Shredding Company violations are being split into two separate violations. One for "Failure of a Stack Test" and the other for "Fugitive Dust Violations." This change will be reflected on next month's report. OES has requested Indianapolis Shredding Company to conduct a stack test within 90 days, which will need to be completed by July 2003. They just received their renewed FESOP so they will need to conduct a stack test to demonstrate compliance. The Board inquired what is the consequence if they fail to conduct a stack test by the time OES requested. Ms. Carlson stated they would be issued a revised NOV.

Metalworking Lubricants has been purposely left open to see if there are other incidents that will need to be included. There have been a couple of other incidents. Staff is waiting on information from Citizens Gas to complete the investigation.

Mr. Richard Van Frank with Improving Kids Environment stated he is increasingly concerned about the pattern that is occurring with Citizens Gas and Coke Utility (CG&CU). CG&CU has a long record of violations. He stated the Enforcement report indicates a Compliance Agreement signed with a penalty of \$2,000.00 being assessed. This penalty does not seem enough under the circumstances of continual violations being committed by CG&CU. He feels when a company continues to have violations, the violations need to be addressed in a more vigorous manner for the protection of public health. Mr. Chavez stated based on these concerns raised by Mr. Van Frank a previous meeting OES has taken action on resolution of these violations. These are difficult issues to resolve. However, OES is doing what is necessary to address the violations independent of the State so that they can be resolved.

Ms. Carlson stated a NOV was issued to Littleton Sand and Supply for fugitive dust in April 2003 and OES has received a request for an appeal. There is a potential for an appeal to be held at the June 12, 2003 APCB meeting.

(School 21)

Mr. Rick Martin provided an update to the Board on the School 21 Project. He stated there was a meeting on April 23, 2003. The majority of the discussion revolved around the monitoring. The State has installed a trailer to house the auto gas chromatograph system at the site. There is still testing and calibration on the gas chromatograph equipment. The meteorological instrumentation has also been installed at the site.

There was discussion on polycyclic aromatic hydrocarbon (PAH) sampling. The platform is currently being installed on the trailer. The PAH monitoring will not begin until June 2003. There will only be ten (10) PAH samples taken due to the cost of the analysis. There has been discussion on how those samples should be collected. The agreement was to collect a background sample. It was suggested that the background sample be collected from the Washington Park site. The next meeting is scheduled for June 18, 2003 at 2:00 p.m. at the Department of Public Works Training Center located at 2700 South Belmont Avenue. Discussion on the PAH samples will continue at that meeting.

There was no one in attendance from the Marion County Health Department (MCHD) so an update on the health assessment survey was not provided.

There was discussion on the environmental assessment at the CG&CU plant. Mr. Chavez stated last week OES met with representatives from EPA, IDEM and CG&CU to discuss the environmental assessment. The meeting was very productive and encouraging. He complimented EPA and IDEM on their thinking "outside the box" that occurred to make this assessment happen. CG&CU had some considerable concerns about liabilities and enforcement issues relative to the audit. They also had concerns with the technical competency of the contractor that will be doing the audit. A process has been created and agreed upon by all the stakeholders on how the audit will happen and how the report will be generated. There will be a redrafting of the scope of work for the actual assessment that will lay out the process that was agreed upon. The meeting was followed up with a correspondence sent from CG&CU to lay out their remaining concerns such as on-site safety.

PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

IDEM will be drafting Requests for Proposal and sending it out to a selected group of consultants that have experience in the coke oven emissions technology recommended by all of the stakeholders.

Mr. Martin stated at the meeting there was also discussion on the inventory being conducted around CG&CU. There were suggestions made during the meeting to include some sources that were not previously thought of such as the Amtrack facility located in Beech Grove. Although they are not in the initial area, they are a Title V source that may have potential impacts.

(Ozone Flex Program)

Mr. Chavez stated the Steering Committee met on April 14, 2003. At that meeting, EPA's preliminary decision to deny the Central Indiana Early Action Compact (EAC) submission was shared with the group. It was denied on the basis of the changing of two (2) of the interim milestone dates which has been discussed at previous APCB meetings. There were two (2) dates that the committee deviated from the EAC guidance, one of which was four (4) months and the other which was six (6) months. One was relative to the implementation of the controls and the other was relative to the finalization of the rulemaking. The EAC submitted by the Steering Committee listed realistic dates that Central Indiana could meet. However, the dates extended beyond the dates EPA and national environmental groups had agreed upon.

The EPA stated if the Committee would make those dates in their EAC consistent with the guidance, they would approve the EAC. The EPA is not in the position where they can allow any relaxation of those guidelines. The Committee decided it would not be a wise decision to change the dates to what was in the EPA guidance because they would be setting themselves up for failure.

A formal letter of denial from EPA has not yet been received. It is anticipated that it will be received soon. Once it is received, it will be shared with the APCB.

There was also a discussion of options on how to proceed. The Steering Committee understands that an excellent stakeholder group has been developed to address air pollution issues for Central Indiana. There was an overwhelming desire to keep the group together to provide input to the State relative to the normal State Implementation Plan (SIP) for ozone 8-hour standard. The City of Indianapolis and IDEM will be meeting to discuss mechanisms by which we can keep the stakeholder group operating. It has been recognized that the non-attainment issue affects all of Central Indiana.

There was discussion on the funding available for non-attainment areas. IDEM provided an overview of the amount of money that is currently allocated to Indiana for the Congestion Mitigation and Air Quality (CMAQ) grants. If EPA rescinds the 1-hour standard when the 8-hour standard is implemented and the non-attainment designation occurs, then under the ozone flex program Marion County can potentially lose its ability to utilize CMAQ funding. If the EAC were approved, the CMAQ funding would not have been an option for the entire Central Indiana Region. This did factor in the Steering Committee's decision not to pursue the EAC.

The Board asked what is the projected date for non-attainment designations. Mr. Chavez stated approximately March or April 2004. The Board also inquired what happens after the designation is made. IDEM is proactively developing the SIP. Normally after the designation is made, then a SIP is developed. There is a lot of work involved in developing a SIP. The Central Indiana Region will be designated moderate non-attainment versus marginal non-attainment. There will be a six (6) year timeframe to attain the standard. The SIP will be due to the EPA by April 2007 and attainment will have to be done by April 2010. The SIP will include modeling, rulemaking, and everything else that will need to be done during the three-year period.

The Board would like to understand what implications for being in non-attainment such as

PRELIMINARY MINUTES - May 8, 2003
INDIANAPOLIS AIR POLLUTION CONTROL BOARD
CITY OF INDIANAPOLIS

what will happen to permits issued and in the process of being issued. They would also like to see what the economic impact would be. The Board would also like to know what the transitional rules are for people who have already applied for permits. It is anticipated that once EPA starts coming out with information on the non-attainment designations there will be an increase in permit applications for modifications.

If the City is designated non-attainment for PM 2.5 annual standard, the SIP for it will be due approximately the same time the SIP for the 8-hour ozone standard. It is also possible if the EPA does not rescind the ozone 1-hour standard that the City will be in non-attainment for that as well if there are more violations of that standard this year.

RE: UNFINISHED BUSINESS

There was none.

RE: NEW BUSINESS

There was none.

RE: ADJOURNMENT

Mr. Rarick made a motion the meeting be adjourned. Mr. Fraley seconded the motion and said motion carried. The next Indianapolis Air Pollution Control Board meeting will be on June 12, 2003 at 9:30 A.M. in room 107 City-County Building.
